

Part XIV.4

Building 695

Storage/Treatment Unit Group

PART XIV.4 BUILDING 695 STORAGE/TREATMENT UNIT GROUP

Table of Contents

1	Overview of Building 695 Storage/Treatment Unit Group.....	1
1.1	General Design and Construction Information	4
2	Secondary Containment Systems	7
2.1	Building 695.....	7
2.2	DWTF Portable Tank Storage Pad	8
2.3	DWTF Truck Bay.....	9
3	Protection of Human Health and the Environment.....	10
3.1	Protection of Ground Water and Subsurface Soils	10
3.2	Protection of Surface Water, Wetlands, and Surface Soils.....	10
3.3	Protection of Air	10
4	Monitoring, Waste Analysis, Facility Inspection, Operational Reporting, Safety Equipment, and Emergency Response.....	19
4.1	Monitoring and Waste Analysis	19
4.2	Facility Inspection and Operating Record	19
4.3	Fire Protection.....	20
4.4	Safety Equipment and Emergency Response	21
5	Container Storage Areas	21
6	Storage/Treatment Tanks	22
6.1	Tank Farm Process Description.....	22
6.2	Types of Waste to Be Treated.....	27
6.3	Effectiveness of Treatment	28
6.4	Design Assessment	28
6.5	Fabrication and Installation Assessment.....	29
6.6	Secondary Containment.....	29
6.7	Underground Tank Requirements	29
6.8	Tank Operating Requirements	30
6.9	Tank Farm Inspections	31
6.10	Closure and Post-closure Requirements	31
7	Miscellaneous Unit Treatment Areas.....	31
7.1	Small Scale Treatment	33
8	Closure Plan	34
	References.....	34

Appendices

Appendix XIV.4-A Drawings of the Building 695 Storage/Treatment Unit Group	A-1
--	-----

Appendix XIV.4-B	Secondary Containment Report for the Building 695 Storage/Treatment Unit Group	B-1
Appendix XIV.4-C	Assessment Report for the DWTF Tank Farm.....	C-1
Appendix XIV.4-D	Waste Blending Station Process Description.....	D-1
Appendix XIV.4-E	Cold Vapor Evaporator Process Description	E-1
Appendix XIV.4-F	Centrifuge Process Description	F-1
Appendix XIV.4-G	Filtration Module Process Description.....	G-1
Appendix XIV.4-H	Shredder/Chopper Process Description	H-1
Appendix XIV.4-I	Debris Washer Process Description	I-1
Appendix XIV.4-J	Solidification System Process Description	J-1
Appendix XIV.4-K	Gas Adsorption System Process Description.....	K-1
Appendix XIV.4-L	Uranium Bleaching Process Description.....	L-1
Appendix XIV.4-M	Pressure Reactor Process Description	M-1
Appendix XIV.4-N	Water Reactor Process Description	N-1
Appendix XIV.4-O	Mercury Amalgamation Process Description	O-1
Appendix XIV.4-P	<u>Bulking</u> /Drum Rinsing Station Process Description	P-1
Appendix XIV.4-Q	Decontamination and Waste Treatment Facility (DWTF) Closure Plan	Q-1
Appendix XIV.4-R	Example Reagents for Treatment in Permitted Units	R-1
Appendix XIV.4-S	Treatment Processes in Hazardous Waste Management Facilities	S-1

Figures

Figure XIV.4-1	Building 695 Location Map	36
Figure XIV.4-2	Typical Container Storage Patterns in the Building 695 Storage/Treatment Unit Group	37
Figure XIV.4-3	Conceptual Process Flow Representation of the Air Emission Control Systems.....	38
Figure XIV.4-4	Process Flow Schematic for the Tank Farm.....	39
Figure XIV.4-5	Legend and Symbols.....	40
Figure XIV.4-6	Piping Schematic for the Tank Farm	41

Tables

Table XIV.4-1	Processes to Be Conducted in the Building 695 Storage/Treatment Unit Group Treatment Systems	42
Table XIV.4-2	Types of Hazardous Waste to Be Processed in the Building 695 Storage/Treatment Unit Group Treatment Systems	43
Table XIV.4-3	Small Scale Treatment Processes to Be Conducted in the Building 695 Storage/Treatment Unit Group	44
Table XIV.4-4	Utilities Provided for Building 695	45
Table XIV.4-5	Secondary Containment Capacities for the Building 695 Containment Zones	46
